Electric cars and hydrogen fuel cell cars will not have TTW figures, as they do not emit CO2 (electric cars don't even have an exhaust). The second CO2 measure is our well-to-wheel (WTW) CO2 figure. This takes account of the CO2 impact of generating the fuel, whether it be petrol, diesel, electricity or hydrogen, and looks at how efficiently the car uses that fuel.

Low-carbon transitions are often assumed as positive phenomena, because they supposedly reduce carbon emissions, yet without vigilance, there is evidence that they can in fact create new injustices and vulnerabilities, while also failing to address pre-existing structural drivers of injustice in energy markets and the wider socio-economy. With this in mind, we examine four European low-carbon ...
