~~Revolutions are often seen in terms of a spontaneous burst of intense political activity; less attention usually is given to the structures, processes, and perceptions that make such activity possible. This innovative book examines such long-term transformations as they relate to the revolution in the Central African nation of Rwanda, which culminated in its independence in July 1962. While much of the previous work on Rwanda has focused on the royal court and central state institutions, The Cohesion of Oppression instead focuses on politics outside the central heartland. Adopting a "view from below," it explores the interaction of central and local power bases and delineates the transformations introduced into the system by German and Belgian colonial policies that consciously sought to bolster one ethnic group as agents of colonial administration. In the three years before independence, violent conflict in Rwanda resulted in the abolition of the monarchy, the expulsion of the ruling Tutsi ethnic group from power, and the installation of rival Hutu authorities to take control of a presidential regime with an elected Assembly. While basic Rwandan cultural norms persisted during and after the revolution, significant alterations had taken place in the locus of political power and social categories that had access to high office. This book considers both the internal and the non-Rwandan influences that substantially affected these alterations but concentrates on the former, since such an approach has in general been more neglected.~~

~~An incisive look at the causes and consequences of the Rwandan genocide 'When we captured Kigali, we thought we would face criminals in the state; instead, we faced a criminal population.' So a political commissar in the Rwanda Patriotic Front reflected after the 1994 massacre of as many as one million Tutsis in Rwanda. Underlying his statement was the realization that, though ordered by a minority of state functionaries, the slaughter was performed by hundreds of thousands of ordinary citizens, including judges, doctors, priests, and friends. Rejecting easy explanations of the Rwandan genocide as a mysterious evil force that was bizarrely unleashed, When Victims Become Killers situates the tragedy in its proper context. Mahmood Mamdani coaxes to the surface the historical, geographical, and political forces that made it possible for so many Hutus to turn so brutally on their neighbors. In so doing, Mamdani usefully broadens understandings of citizenship and political identity in postcolonial Africa and provides a direction for preventing similar future tragedies.~~

~~Events in Rwanda in 1994 mark a landmark in the history of modern genocide. Up to one million people were killed in a planned public and political campaign. In the face of indisputable evidence, the Security Council of the United Nations failed to respond. In this classic of investigative journalism, Linda Melvern tells the compelling story of what happened. She holds governments to account, showing how individuals could have prevented what was happening and didn't do so. The book also reveals the unrecognized heroism of those who stayed on during the genocide, volunteer peacekeepers and those who ran emergency medical care. Fifteen years on, this new edition examines the ongoing impact of the 1948 Genocide Convention and the shock waves Rwanda caused around the world. Based on fresh interviews with key players and newly-released documents, A People Betrayed is a shocking indictment of the way Rwanda is and was forgotten and how today it is remembered in the West.~~

~~The majority of the existing work on nationalism has centered on its role in the creation of new states. After Independence breaks new ground by examining the changes to nationalism after independence in seven new states. This innovative volume challenges scholars and specialists to rethink conventional views of ethnic and civic nationalism and the division between primordial and constructivist understandings of national identity. "Where do nationalists go once they get what they want? We know rather little about how nationalist movements transform themselves into the governments of new states, or how they can become opponents of new regimes that, in their view, have not taken the self-determination drive far enough. This stellar collection contributes not only to comparative theorizing on nationalist movements, but also deepens our understanding of the contentious politics of nationalism's ultimate product--new countries." --Charles King, Chair of the Faculty and Ion Ratiu Associate Professor, Georgetown University School of Foreign Service "This well-integrated volume analyzes two important variants of nationalism-postcolonial and postcommunist--in a sober, lucid way and will benefit students and scholars alike." --Zvi Gitelman, University of Michigan Lowell W. Barrington is Associate Professor of Political Science, Marquette University.~~

~~This book uses an integrated approach to understanding regional and local community culture and sociopolitical development in developing countries, especially in Sub-Saharan Africa. The contributors argue that the state, as well as civil society, confers a legitimacy on cultural differences that can be achieved in no other way but by positive cooperation.~~

~~This book brings together leading edge scholarship and emerging approaches to conflict transformation from a communication perspective. It illustrates the centrality of communication in analyzing, understanding, and creating transformation in community, environmental, regional, and global conflicts.~~
