Problem #1: If you
dilute 175 mL of a

Read Online Concentration

1.6 M solution of
LiCl to 1.0 L,
determine the new
concentration of
the solution.

Solution: $M_1 V_1 = M_2 V_2$
 (1.6 mol/L)
 $(175 \text{ mL}) = (x)$
 (1000 mL)
 $x = 0.28$
M. Note that 1000
mL was used rather
than 1.0 L.

Remember to keep

ChemTeam:

Dilution Problems
#1-10

How many water
you have to add to
450 ml of a
solution 0.3 M to
obtain a
concentration 0.25
M ? This problems
can be easily
solved by

Read Online Concentration

remembering that $M_i V_i = M_f V_f$ and

$$\text{thus } (0.45)(0.3) = (0.25)(V_f)$$

$$(0.45)(0.3) V_f = \text{-----} = 0.54 \text{ liter} = 540 \text{ ml}$$

Therefore the water to add is $540 - 470 = 70 \text{ ml}$.

Alternatively we can observe that the initial concentration is

Read Online Concentration

$$0.3/0.25 = 1.2$$

times more
concentrated than
the final one.

Concentration

Units: Solved

Calculating the concentration of a

Read Online Concentration

Solution Problems

Chemical solution is a basic skill all students of chemistry must develop early in their studies. What is concentration? Concentration refers to the amount of solute that is dissolved in a solvent. We normally think of a solute as a solid

Read Online Concentration

that is added to a solvent (e.g., adding table salt to water), but the solute could easily exist in another phase.
