WAT Test. The WAT Test or the Welsh Anaerobic Test was developed by the WRU to test the fitness of it ’ s international players. It ’ s a good choice of test as it includes change of direction and getting off the floor which make it a bit more rugby specific than other tests. It also includes rest periods to better mimic the demands of rugby. You need cones at 0m, 2m, 5m and 15m.

Fitness standards for Rugby. Followers of rugby union will recognise the varied type of physical performance qualities required for the game, including the ability to accelerate or sprint at maximal pace for short periods (e.g. three seconds), maintain a fast striding pace for the duration of the average move (e.g. eight seconds), recover during differing rest periods to repeat these types of exercises, jump, change speed and direction, use upper body muscles, and so on.
