Welcome to my page of solutions to "Introduction to Algorithms" by Cormen, Leiserson, Rivest, and Stein. It was typeset using the LaTeX language, with most diagrams done using Tikz. It is nearly complete (and over 500 pages total!!), there were a few problems that proved some combination of more difficult and less interesting on the initial pass, so they are not yet completed.

Using an approximate algorithm (assuming that it is not too far from optimal) does not introduce errors greater than what has already been introduced in the approximations done earlier. There are of course cases where we want no errors in the algorithms that we use, for example in any algorithm that involves monetary calculations.
