By Liah Greenfeld. The great and good of the Western world are alarmed. Nationalism, they say—rising from the primeval depths of biological human nature, untouched by the civilizing influences of History whose telos is global democracy—undermines the achievements of enlightened humanity. It poses an inherent threat to just societies—those based on the universal values of freedom, equality, and fraternity.

It links nationalism to the market society in complex ways. Liah Greenfeld's challenging, historically buttressed argument is bound to attract a wide and attentive audience.--Suzanne Keller, Princeton University Greenfeld offers a riveting follow-up to Nationalism: Five Roads to Modernity. Here she seeks to answer three questions: what caused the emergence of the modern economy, what made the economic sphere so dominant; and what are the reasons for sustained economic growth?

The Spirit of Capitalism: Nationalism and Economic Growth ...

Nationalism is a movement and a state of mind that brings together national identity, consciousness, and collectivities. It accomplished the great transformation from the old order to modernity; it placed imagination above production, distribution, and exchange; and it altered the nature of power over people and territories that shapes and directs the social and political world.

Nationalism — Liah Greenfeld | Harvard University Press

Nationalism and globalization are often considered processes leading to opposite poles in cultural, economic, and political history, but in fact the relationship between them has been far more complex, and in the past century and a half they may be said to have worked in tandem. Nationalism emerged in a sixteenth-century country in Western Europe – England – its emergence coinciding with the dawning of “the European Age in History”: the rise of Western Europe, in particular, and ...
