Our range of lighting towers, generators, welder generators, pressure washers and pumps are designed and built for a range of applications from construction, rail and mining to events, sport and film. Like all businesses we have felt the impact of COVID-19 and have taken all the necessary measures to protect our people and our future business.

## Construction Site Machinery | Site Equipment & Site Machinery

An excavator is a heavy piece of machinery used to dig and crush material on a site. It consists of a hydraulic crane-like boom with a metal shovel that has sharp prongs on the end. The driver's cab is set on a rotating platform, making the machine more maneuverable. The machine is mobile due to an undercarriage consisting of heavy-duty tracks.

Use of plant and vehicles on site. This depends on the site activities but can include machinery such as breakers, bulldozers, dumpers and excavators. Plant and machinery that is used at construction sites is not regulated by the government to the degree that other vehicles are.

Construction Pollution | Types & Prevention Methods

A construction site is any piece of land where a building is being built or repaired. Those who work on construction sites are often required to use large tools and pieces of machinery, work at height, and in environments where hazardous materials are present. Because of the nature of such work, working on construction sites can be dangerous.

Lifting equipment for the construction industry

# Get Free Machines On A Construction Site Machines At Work

Heavy equipment or heavy machinery refers to heavy-duty vehicles, specially designed for executing construction tasks, most frequently ones involving earthwork operations or other large construction tasks. Heavy equipment usually comprises five equipment systems: implementation, traction, structure, power train, control and information. Heavy equipment has been used since at least the 1st century BCE when the ancient Roman engineer Vitruvius described a crane in De architectura when it was power
